

MADE-TO-MEASURE

1. PNEUMATIC CONTROL BOXES

Control boxes are made in function of customer specifications with a **wide variety of pneumatic components** like control valves, function valves, pressure regulators, filters, electronics and external connections. They are **professional assembled** & finished with short delivery terms.

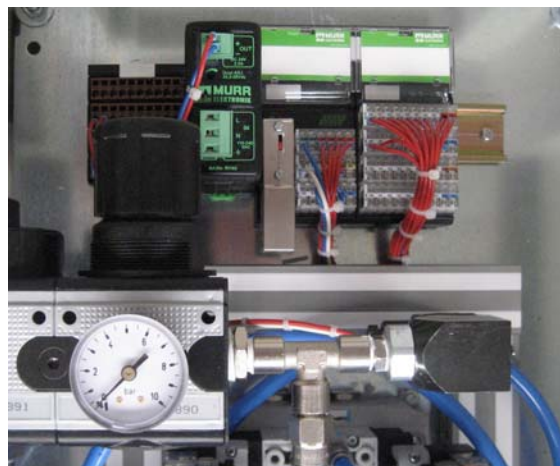

Your advantages

- Single source for components & assembling
- Selection of the best suitable components available
- Pneumatic, electric, electronic, vacuum, pressure sensing and controlling
- Fast & professional assembled & tested

Technical modifications keep in reserve !

(2009/01)

More and more industrial production plants are operated with a **serial communication**. So, the control boxes will also be equipped with this integrated electronics. This gives you many advantages like:

- The operation of your complete production plant with **1 central fieldbus protocol**, e.g. Profibus DP with the Murr Electronic Cube20
- Reliable and quick monitoring
- Compact and easy to mount

2. PRE-ASSEMBLED COMBINATIONS OF PRODUCTS IN SETS/KITS

Valves with fittings and silencer

Cylinders with accessories

FRL with fittings and mounting accessories

Cylinder/Valve combinations and accessories

Recurrent series of pneumatic products (with a lot of possible combinations) can be pre-assembled on customer specifications.
